## Skills

---

- Swift, XCode, CoreLocation, CoreData, AutoLayout/Interface Builder, Unit Testing, CocoaPods, SQL, HTML, CSS, Python, C#, VB.NET, Javascript, Git, MVC, Jira, and Scrum

## Experience

---

### Denari Software / Software Developer

December 2016 - Present, Wellington, FL

- Led development of a product used by 65% of clients which resulted in a 50% decrease in support tickets and increase in stable weekly releases. (VB.NET, ASP.NET, SQL Server, Kendo UI, Javascript, jQuery)
- Designed and built an internal API to connect third party services which led to a 20% increase in customer satisfaction and a 90% increase in support ticket turnaround time. (VB.NET, Web API, ASP.NET)
- Evaluated and implemented fraud prevention APIs which reduced fraudulent transactions by 98%. (C#, ASP.NET, Javascript, SQL Server)
- Led a team of developers to design a new crowd funding product. (C#, Web API, ASP.NET)

### [Vivid Arts](#) / Part Time - iOS Development Internship

January 2017 - June 2017, Palm Beach, FL

- Integrated videos into the application which led to an increase in user engagement and retention. (Swift, Cocoapods, MongoDB, Parse)
- Aided in migration of database from Parse to Firebase Realtime Database.

## Projects

---

### [FlashBax](#) / iOS Application

February 2018

Created an application that allows users to post and view media at their current location and locations they have visited. (Swift, Node.js, Firebase, Cocoapods, CoreLocation, Push Notifications)

### [SeenSurfer](#) / Florida International University Hackathon Project

March 2018

Built client facing application that provides real time data analytics on venues so users can see where they want to spend their time by checking the live data, accomplished by using Computer Vision. (Swift, Node.js, Firebase, Cocoapods, AWS)

### [SwampBox](#) / University Of Florida Hackathon Project

January 2018

Built the client facing application that manages and facilitates peer to peer rentals and item sharing through a network of internet connected and facial recognition secured boxes by allowing users to create a profile as well as reserve, rent and return items. (Swift, Node.js, Firebase, Cocoapods, AWS)

### [The Powerlist](#) / iOS Application

April 2017

The Powerlist is a tool that helps users effectively meet goals and form good habits by listing and keeping track of the five critical daily tasks needed to push them towards a set of goals. (Swift, CoreData, Cocoapods)

## Education

---

### [Palm Beach Code School](#) / Web Development

September 2016 - March 2017, Palm Beach Gardens, FL

- Participated in the Web Development program where I amassed knowledge in HTML, CSS, Javascript, jQuery, PHP, MySql, Bootstrap, Wordpress, Git, GitHub, and Photoshop in class and online using teamtreehouse.com.
